

The ASCP is spearheading a **certification program** for interdepartmental offices on Auraria Campus. Ranked on points, departmental offices, and their green "office leaders" initiate sustainable and eco-friendly alternatives into campus office environments.

The **goal is to inspire** behavior changes and reduce campus-wide waste and carbon emissions through ecologically-minded sourcing practices, compost & recycling efforts, and reducing electricity usage.

The mission of the Green Office Program is to increase all staff, teacher, and administrator knowledge about behavioral changes that will contribute to the **overall sustainability practices** of the office or department.

GREEN OFFICE

Auraria Sustainable Campus Program

The Auraria Campus has signed onto the American College and University President's Climate Commitment to **reduce our carbon emissions by 20% by 2020**. By becoming a Green Office, you will be helping the ASCP's commitment to reduce the Auraria Campus' ecological impact and dependence on fossil fuels.

By incorporating the Green Office Program, together the offices and the ASCP will internally create a sustainability movement that will help unite Auraria Campus into a more sustainable community.

LEVEL OF GREEN OFFICE CERTIFICATION:

BRONZE

SILVER

GOLD

PLATINUM

HELP MAKE AURARIA CAMPUS MORE SUSTAINABLE!

By reducing your office's waste energy consumption and taking steps toward being more sustainable, you can save on your utility bills, improve your space's function and comfort, and better engage your employees and guests.

- * The ASCP will help jumpstart efforts by providing composting bins and LED light bulbs, The ASCP will also support the office/department with training, education, and general know-how to further opportunities to reach sustainability certification.
